

July 2022

So far the weather for our events has behaved well. The weekend of 11th and 12th June was busy for a few of us, if you can call sitting in the sun with the cars, hard work. Four of our cars and Roy's motorbike visited the Datchworth fete. As David Holland only lives a few yards from the village green, the term visitor doesn't seem applicable. It was a very pleasant afternoon with all the traditional fete attractions.

The following day, along with Alan, Barb and Keith we were at the Luton Festival of Transport which, as usual, attracted hundreds of cars. We had the usual stroll around and enjoyed some extremely good fish and chips before another leisurely afternoon.

A few members went to the show at Oakhill Park which was very busy apparently. Keith O took his Ford Model A which needless to say had a lot of admirers. I understand that there were two separate fields; one for classics and the other for more modern cars.

This coming weekend (9th & 10th) is also a case of two events. The show in Hoddesdon High Street returns after a couple of years, and a few of us are booked in for that. Then, on Sunday 10th, it is a very welcome return to the Kimbolton Fayre, which has been one of our favourite shows for many years due to the great display of cars and the variety of other things to see. Hopefully the good weather I mentioned will continue for the weekend.

July 24th sees a clash of events with Area 33's day at Hyde Hall, which I know has been a popular event for several years.

The same day is National/XK Day at the former home of Sir William Lyons, Wappenbury Hall, with dinner the previous evening being held at Wroxhall Abbey.

I am sure we all feel for Keith W. who, after only doing about two hundred miles in his E type since substantial mechanical work, was involved in a three car crash while he was actually stationary. He now has the trials and tribulations of insurance claims to go through.

I hope nobody gets caught up in the go slow protests on the motorways about fuel costs.
